PRESS REVIEW

Energy Transition

📅 Review Date : October 5, 2025

EUROPEAN POLICY

30/09/2025 • Clean Energy Wire

EU policies mandate significant reductions in energy consumption and an increase in renewable share in energy use, with EU and France specifically targeting 33% renewables by 2030.

MARKET TRENDS

29/09/2025 • Strategic Energy

In the fourth week of September, weekly electricity prices increased in most European markets, exceeding €60/MWh due to increased demand and reduced renewable production.

ELECTRICITY CONSUMPTION

27/09/2025 • EEA Europe

Final energy consumption has shifted in Europe, with increasing reliance on renewables (from 6% to 14%) and electricity (from 23% to 26%) in comparison to 2023, highlighting a move toward cleaner energy sources.

COOPERATION

23/09/2025 • Clean Energy Wire

France and Germany have strengthened cooperation, agreeing not to oppose each other's energy policies, particularly concerning nuclear and hydrogen infrastructure extensions.

ENERGY FINANCE

23/09/2025 • Aurora Energy Finance Conference

The conference highlighted the need for resilient financial strategies, flexible assets like storage, and adaptation to negative electricity prices and market signals due to the growing share of renewables.

RENEWABLE ENERGY

09/09/2025 • Connaissance des Énergies

In early September, Europe experienced mixed trends in solar and wind energy, with solar photovoltaic production rising in the French, Italian, and Spanish markets compared to the prior week.

ENERGY POLICY

05/09/2025 • usinenouvelle.com

France is set to finally adopt its long-awaited energy programme PPE 3, which remains controversial due to division between nuclear and renewable energy supporters. The plan includes a significant expansion of nuclear power with 14 new reactors planned, targeting 27 GW of capacity by 2050.

LEGISLATION

05/09/2025 • usinenouvelle.com

The Gremillet Law, structuring France's energy transition, was passed by the Senate but faced resistance in the National Assembly due to a proposed moratorium on new wind and photovoltaic projects.

ENERGY CONVERSION

05/09/2025 • usinenouvelle.com

France plans to convert coal-fired plants to gas instead of outright closures, specifically targeting the Émile Huchet plant, while Cordemais is scheduled for shutdown by 2027.
